E-commerce store

Location

02/2024 - 02/2024

E-commerce Store:

As a personal project, I created an e-commerce store using HTML, CSS, and JavaScript, where users can browse and purchase products. I designed the website with a focus on usability and aesthetics, ensuring that the shopping experience is intuitive and visually appealing. I implemented features such as product listings, a shopping cart, and a checkout process. I also optimized the website for performance and search engine optimization (SEO), ensuring that it ranks well in search results. Overall, this project demonstrates my ability to design and develop functional and visually appealing e-commerce websites.

Project 1: Personal Portfolio Website

I designed and developed a personal portfolio website using HTML, CSS, and JavaScript, showcasing my skills and projects. I focused on creating a modern and responsive design to ensure a seamless experience across devices. I incorporated dynamic elements to make the website engaging, such as interactive animations and a dynamic project gallery. Throughout the project, I demonstrated my attention to detail and passion for frontend development, resulting in a website that reflects my unique strengths and interests.
